

Accelerate your Microsoft 365 journey with partner-led services

CSP Deployment Accelerator for Microsoft 365 E3

The CSP Deployment Accelerator for Microsoft 365 E3 helps eligible organizations deploy, secure, and adopt Microsoft 365 E3 with support from a qualified Microsoft partner. With Microsoft co-funded, partner-led deployment and adoption services, customers can reduce deployment complexity, strengthen identity and endpoint security, and help users get value from Microsoft 365 E3 faster while building an AI-ready foundation for Microsoft 365 Copilot.

Program Benefits

✓ Funded Services

Microsoft co-invests in deployment and adoption services delivered by partners.

✓ Faster ROI

Accelerate deployment of Microsoft 365 BP workloads and help users become productive faster.

✓ Security first

Implementation of security services (ex. identity, device management, or governance controls).

✓ Adoption support

Awareness, learning plans, and ongoing optimization.

Eligibility

To qualify, customers must:

- Purchase a minimum of 50+ incremental Microsoft 365 E3 seats through eligible CSP transactions.
- Work with an eligible Microsoft partner to validate eligibility and plan deployment.
- Complete eligible CSP transactions between July 1, 2026, and June 30, 2027.
- Engagement delivery is limited to one (1) approved claim per customer tenant.

What to expect

Your partner may help you:

- Prepare your tenant for Microsoft 365 E3 deployment.
- Deploy and configure Microsoft 365 E3 workloads, including Microsoft Entra ID P1 and Microsoft Intune P1.
- Migrate from Configuration Manager or third-party MDM to Intune or deploy new cloud-native Windows endpoints.
- Configure security and governance policies to help protect users, devices, and company data.
- Support adoption through training and change management.

Ready to get started?

Coordinate with your Microsoft account team or Microsoft partner to validate eligibility, confirm seat requirements, and plan your deployment. You'll receive hands-on support to help deploy, secure, and adopt Microsoft 365 E3 across your organization establishing the secure foundation that's ready for Microsoft 365 Copilot and broader AI scenarios.
